INDEX TO VOLUME XXX.

A.

Academy of Natural Sciences of Philadelphia, Mr. Maclure's present to, 187.
——— of Science and Literature, Maryland, 192, 395.
Agassiz, award of Wollaston medal to, by the London Geological Society, 382.
——— work on Fossil Fish, analysis of, 33.
Agriculture, use of calcareous manures and limestone in, 138, 383.
Albany Institute, hourly meteorological observations at, Dec. 21, 1835, 194.
Albite, analysis of, 381.
Alkali, a new one in opium, 379.
Alum for ornaments, 168.
——— coating busts, 171.
American new scientific publications, 198.
Analysis of Albite, 381.
——— Chabasies, 366.
——— Dreelite, 380.
——— gastric juice, 378.
——— water of the Gray Sulphur Springs of Virginia, 100.
——— Meteorites, 176.
——— Tabasheer, 381.
Antimoniuret of nickel, new species, 177.
Antimony and lead, double sulphuret of, 177.
Apophyllite, 345.
Argulus, new species of, 388.
Arts and manufactures, new books on, 202.
Ash, influence of, on serpents, 208.
Atmospherical electricity, 376.
Aurora borealis, 131.
——— its influence on the magnetic needle, 228.

B.

Bache, Prof. A. D., inquiry in relation to the alleged influence of color on the radiation of non-luminous heat, 16.
Bachman, Rev. J., on the migration of North American birds, 81.
Barometer, influence of sound on, 377.
Birds, migration of North American, 81.
Blake, Eli W., on the resistance of fluids, and on the measure of mechanical power, 359.
Blomidon, Cape, minerals of, 348.
Bonnycastle, Capt. R. H., on aurora borealis and solar phenomenon, 131.
Bonnycastle, Capt. R. H., on the transition rocks of the Cataraqui, 233.
Botanical press of Dr. Locke, 54.
Botany, Gray's Elements of, 399.
——— new works in, 201.
Brevicite, a new mineral, 178.
Bronzing iron and gun barrels, 173.
Burden's boat introduced into France, 174.
Busts and casts, coating for, 171.

C.

Calcareous manures, 138, 383.
Calc spar, hemitrope crystals of, 347.
Calorifactor, 168.
Carburetted hydrogen, a new variety, 180.
Caricography, 59.
Carpenter's Family Medicine Chest Dispensatory, 399.
Carrara marble, 176.
Cataraqui, transition rocks of the, 233.
Cements, 168, 171.
Chabasie, 349.
——— analyses of, 366.
Chalk, corals, &c. in English, 382.
Chemistry, new works in, 201.
Chili, rising of the sea coast of, Nov. 1822. 110.
Chimnies, smoky, movable hood for, 170.
Circulation in insects, 186.
Clarke, Rev. W. A., on the origin of shooting stars, 369.
Coal formation of Tennessee, 391.
—— mine, issue of gas from, 185.
Color, influence of, on radiation of heat, 16.
Columbite of Middletown, notice of a large crystal of, 387.
Comet of Halley, observations on, 209.
Corals in English chalk, 382.
Cramp, cure for, 169.
Crystals, twin, formation of, 275.
Cuvier, statue of, 184.

D.

Dana, J. D., on the formation of twin crystals, 225.
——— on two American species of the genus Hydrachna, 355.
Day, G. E., on the late efforts in France and England to restore hearing to the deaf and dumb, 301.
Deaf and dumb, late efforts for restoring hearing to, 301.

Definitions, 28, 266.
Del Rio, A., observations of, on Professor Shepard's Reply in Vol. 27, 384.
Dewey, Prof. C., on Caricography, 59.
Douglas, Mr. David, death of, 196.
Dreelite, a new mineral, analysis of, 380.
Dry rot, cause of, 182.
Dynamic phenomena, causes of, 181.

E.

Earthquakes and rising of the coast of Chili, in Nov. 1822, 110.
Electricity, atmospheric, 376.
Elements of Botany, by A. Gray, M. D., notice of, 399.
Elliptical motion, variation of arbitrary constants in, 248.
Emmons, Prof., notice of a scientific expedition to Nova Scotia, 330.
Expansion of solids, instrument for measuring, 324.
Eyes of flies reddened by nitric acid, 196.

F.

Filtration of water for domestic use, 172.
Fishes, fossil, 33.
Flies, eyes of, reddened by nitric acid, 196.
Fluids, resistance of, 164, 359.
Foot, Dr. Lyman, on Indian summers, 9.
Fossil fishes, Agassiz' work on, 33.
—— trees in Nova Scotia, 339.
—— wax, 185.
Founderies of iron in Russia, improvements in, 181.
Freezing mixture, 168.

G.

Galleries, subterranean, locust wood used in, 182.
Gas, issue of, on boring into a coal mine, 184.
Gas light from peat, 189.
Gastric juice, analysis of, 378.
Geological and mineralogical notice of Nova Scotia, 330.
———— features of Ohio, remarks on, 394.
———— Journal, London, No. I. 382.
———— notice of the region around Fort Winnebago, by Lieut. Ruggles, 1.
———— report of Maryland, 393.
———— Dr. Troost's, of Tennessee, 391.
———— Soc., London, Wollaston medal of, to M. Agassiz, 382.
———— specimens and surveys in the United States, notes on, 203.
———— surveys in the United States, notice of, 393.
Geology, Comstock's outlines of, second edition, 400.
Geology, and Genesis I., remarks on Prof. Stuart's exposition of, 114.
———— and mineralogy, new publications in, 199.
Glass, vibration of, producing movements on the surface of water, 192.
Glauber salts for tightening oil casks, 173.
Gray, Dr. A., Elements of Botany, 399.
Gray Sulphur Springs, Va., analysis of the water of, 100.
Greenland, subsidence of the coast of, 379.

H.

Halley's comet, observations on, by Mr. E. Loomis, 209.
Harlan's Medical and Physical Researches, 188.
Heater, 168.
Heat, influence of color, on the radiation of, 16.
Hemitrope crystals of calc spar, 347.
Heulandite, 346, 348.
Hildreth, Dr. S. P., foreign notice of his paper in Vol. XXIX. on the coal formations of the West, 399.
———— meteorological journal and observations at Marietta, Ohio, 56.
———— on the Lias of the West, 395.
Hood for smoky chimnies, 170.
Hydrachna, two American species of, 355.
Hydrogen, a new carburetted, 180.

I.

Impressions of the feet of mammalia in sandstone, 191.
Indian summers, Dr. Foot on, 9.
Ink, recipe for, 169.
Insects, circulation in, 186.
Iron, bronzing of, 173.
—— cement, 171.
—— founderies of Russia, improvements in, 181.
—— in the lava of Mount Etna, 186.
—— silvering of, 169.
—— to purify cold short, 173.

J.

Jackson, C. T., on the collection of geological specimens, and on geological surveys, 203.
Johnston, Prof., notice of a large crystal of Columbite, 387.
Journal, London Geological, 382.
Joy, Capt., on the rising of the sea coast of Chili in Nov. 1822, 113.

K.

K., remarks of, on Prof. Stuart's examination of Gen. I., 114.
Keely, Prof. G. W., on the resistance of fluids, 164.

L.

Lagrange, Count, memoir of, 64.
Laumonite, locality of, 345.
Lead and antimony, double sulphuret of, 177.
Lias of the West, 395.
Lime, as a manure, 138.
Limestone, fertilizing properties of, 383.
Locke, Dr. J., botanical press of, 54.
Locust wood, used in subterranean galleries, 182.
London Geological Journal, No. I. 382.
Loomis, E., observations on the Comet of Halley, 209.
———————————— variation of the Magnetic Needle, 221.
Lyell, Mr., award of Medal of the Royal Society to, 174.

M.

Maclure, Wm. Esq., present of books to the Academy of Natural Sciences of Philadelphia, 187
Magnetic Needle, influence of Aurora on, 228.
———————— observations on the variation of, 221.
Maize Sugar, 174.
Mammalia, impressions of the feet of in Sandstone, 191.
Manures, Calcareous, essay on, 138.
———— ————, uses and fertilizing properties of, 385.
Marble, Carrara, transformed oolite, 176.
Marietta, Ohio, Meteorological observations at, for 1835, 56.
Maryland Acad. of Sci. and Lit. 192, 395.
———— Report on new Map of, 393.
Mathematics and Astronomy, new works on, 202.
Mather, Lieut. W. W., on an instrument for measuring the expansion of solid bodies, 325.
Mechanical power, measure of, 359.
Medal of the Royal Society conferred on Mr. Lyell, 174.
——— Wollaston, M. Agassiz, 382.
Med. and Phys researches, Harlan's, 188.
Memoir of Lagrange, 64.
Mesotype, 345.
Meteoric phenomena, 131.
Meteorites, analysis and fall of, 175.
Meteorological, hourly observations at Albany, Dec. 21, 1835, 194.
———————— Journal and observations at Marietta, Ohio, for 1835, 56.
———————— table at Fort Winnebago, for quarter ending March 31, 1835, 13.
Meteors of Nov. 14th, 1835, 347.
———— origin of, 369.
Migration of N. American Birds, 81.
Mollusca, shower of, 187.
Morris, Wm. R. on the influence of the Ash on reptiles, 208.
Mosaic Cosmogony, remarks on Prof. Stuart's examination of Gen. I., 114.
Motion, variations of the arbitrary constants in elliptical, 248.

N.

Natural History Society, Yale, 187.
———————— new publications in, 198.
———— Philos. new publications in, 201.
———— Sciences, Philadelphia, Acad. 187.
Needle, magnetic, influence of Aurora on, 228.
————, observations on the variation of, 221.
Needlestone, locality of, 349.
New publications, 198.
New York University, report of the Regents of the, 389.
Nickel, new Antimonuret of, 177.
Nitric acid, eyes of flies reddened by, 196.
Nova Scotia, mineralogical expedition to, 330.
————————, minerals of, 345.
————————, organic remains of, 339.

O.

Oerstedite, a new mineral, 179.
Oil casks tightened by Glauber's salt, 173.
Olmsted, Prof., on the origin of shooting stars, and those of Nov. 14, 1835, 370.
Opium, a new alkali in, 379.
————, new substances extracted from, 179.

P.

Paramorphine, a new vegetable extract, 179.
Peat, its application to gas light, 189.
Peter's Point, N. S., minerals of, 345.
Philadelphia Acad. of Nat. Sciences, 187.
Phloridzine, a new veget. principle, 377.
Plenakite, new locality of, 177.
Pliny, on the influence of the Ash on reptiles, 208.
Pseudomorphine, a new vegetable extract, 179.
Puvis' Essay on Lime as a manure, 138.

R.

Radiation of heat, influence of color on, 16.
Railways, vibration of, 382.
Rain of Mollusca, 187.
Rattlesnake, influence of the Ash on, 208.
Remarks on Prof. Stuart's examination of Gen. Chap. I., 114.
Report of the Regents of the University of the state of N. Y. for 1836, 389.
Resistance of fluids, 164, 359.
Riddell, Prof. J. L., on the geological features of Ohio, 394.

Rising of the Sea coast of Chili, Nov. 1822, 110.
Robinson, I. Esq., on the rising of the Sea coast of Chili, Nov. 1822, 110.
Ruffin's essay on calcareous manures, 138.
Ruggles, Lieut. D., on the geology, &c. of the region about Fort Winnebago, M. T., 1.
Russia Iron founderies, improvements in, 181.

S.

Safe for provisions, 169.
Sandstone, impressions of the feet of Mammalia in, 190.
Shepard, Prof. C. U., analysis of the Gray Sulphur Springs, Va. 100.
——— del Rio's observations on his "reply," 384.
Shooting stars, their origin, 369.
Silvering iron, 169.
Society, Yale Natural History, 187.
Soda, supercarbonate of, new mode of making, 189.
Solar phenomenon, 131.
Solid bodies, instrument for measuring expansion of, 324.
Sound, effects on the Barometer, 377.
Springs, Gray Sulphur, Va., analysis of, 100.
Statue of Cuvier, 184.
Steam Boat, Burden's in France, 174.
Stilbite, 346.
Strong, Prof. T., on the variations of the arbitrary constants in elliptical motion, 248.
Stuart's, Prof. M., examination of Gen. I., remarks on, 114.
Subsidence of the coast of Greenland, 379.
Subterranean galleries, locust wood used in, 182.
Sulphuret, double, of antimony and lead, 177.
Sugar from maize, 174.

T.

Tabasheer, analysis of, 381.
Taxidermy, solution for, 183.
Thebaine, a new alkali from opium, 379.
Thermometer, measuring expansion of solid bodies, 324.
Thomsonite, 345.
Tennessee, Troost's third geological report, 391.
Transactions of the Maryland Academy of Science and Literature, 395.
Transition rocks of the Cataraqui, 233.
Troost's, Prof., third geological report on the coal formations in Tennessee, 391.
Twin crystals, on the formation of, 275.

V.

Val di Noto, Gemellaro's second memoir on extinct volcanoes of, 382.
Variation of the Magnetic needle, 221.
Veratria, 190.
Vibration of railways, 382.

W.

Water, filtration of, for domestic purposes, 172.
——— movement produced by vibration of glass, on the surface of, 192.
Wax, fossil, 195.
Whelpley, J., on two American species of Hydrachna, 354.
Wilkie, Rev. D., on definitions, 28, 266.
Winnebago, Fort, M. T., geological and miscellaneous notice of the region around, 1.
Wollaston Medal, to M. Agassiz, 382.

Y.

Yale Natural History Society, 187.

Z.

Zoology, new works in, 200.
